

**CLEAN VERSION OF AMENDMENTS**

14. (amended) A skin cosmetic or dermatological preparation comprising, in addition to customary additives, at least one copolymer obtained by

- d/
- (i) free-radically initiated copolymerization of a monomer mixture consisting of
    - (a) 1 to 99.99% by weight of at least one monomer chosen from N-vinylimidazoles and diallylamines, optionally in partially or completely quaternized form;
    - (b) 0 to 98.99% by weight of at least one neutral or basic water-soluble monomer which is different from (a);
    - (d) 0 to 50% by weight of at least one free-radically copolymerizable monomer which is different from (a) or (b) and from unsaturated acids or unsaturated anhydrides; and
    - (e) 0.01 to 10% by weight of at least one monomer which acts as crosslinker and has at least two ethylenically unsaturated, nonconjugated double bonds; and
  - (ii) subsequent partial or complete quaternization and protonation of the polymer in the case where the monomer (a) is unquaternized or only partially quaternized.
